

vaulx

The on-chain credit protocol.

Connecting asset-rich individuals in high-rate markets to yield-seeking global capital — secured by verifiable physical luxury collateral with deterministic on-chain liquidation.

All in smart contracts. Vaulx doesn't take custody. Vaulx doesn't hold capital.

ATOMIC INVARIANT

no USDC disburses without licensed-custodian signature

GLOBAL CORE

8 of 10 modules ship globally · 2 swap per market

DEVNET LIVE

4 Anchor programs · 45+ tests · indexer + bridge

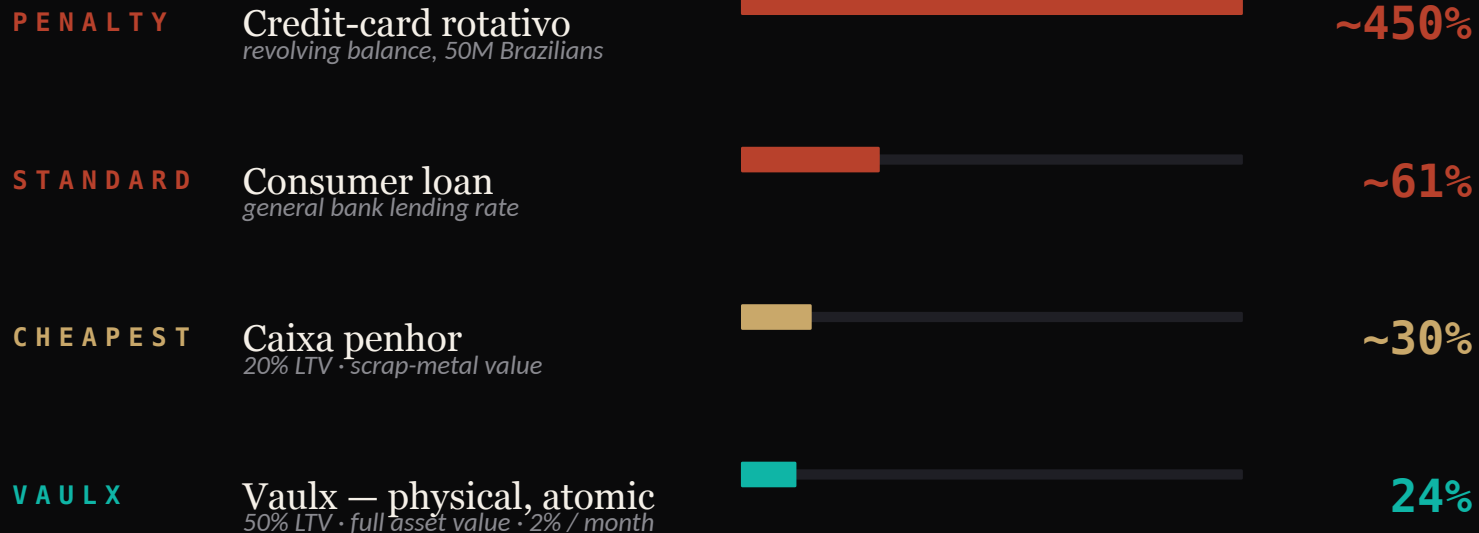

github.com/Vaulxfi · vaulx.vercel.app · Solana Devnet **live today**

Brazil's credit ladder is broken at every rung.

Asset-rich borrowers face punitive rates. Global onchain capital sits at single-digit yield with no rail to reach them.

THE BRAZILIAN RATE STACK

Sources: Banco Central do Brasil · Trading Economics · Caixa Federal published rates · rotativo = revolving balance past 30-day grace.

GLOBAL ONCHAIN CAPITAL

8–10%

APR · institutional yield

Cheap. Patient. Institutional. Global liquidity priced at single digits — and no trustable rail between this capital and Marcelo's Rolex.

BTC / ETH-as-collateral exists. Not the use case.

→ The gap is not capital. *The gap is the rail.*

Why Solana. Why now.

Three primitives × four institutional adoption signals. The institutional money is moving onchain — on Solana — this quarter.

WHY SOLANA

cNFT (Bubblegum)

\$0.0005

per mint

Luxury class scales globally

Native SAS

1×

KYC, infinite reads

Reusable across the Solana RWA stack

Composability

Anchor

CPI

We originate. Kamino · Loopscale run lending markets.

WHY NOW · INSTITUTIONAL ADOPTION

RWA TVL ON SOLANA

\$2.3B+

BlackRock BUIDL · Franklin FOBXX

→ Sumsub × Solana SAS integration (May 2025) gave us reusable KYC. None of this stack existed 18 months ago.

No custody signature. No USDC.

Atomic. Onchain. The licensed-custodian signature is the release trigger — enforced in a single Solana transaction.

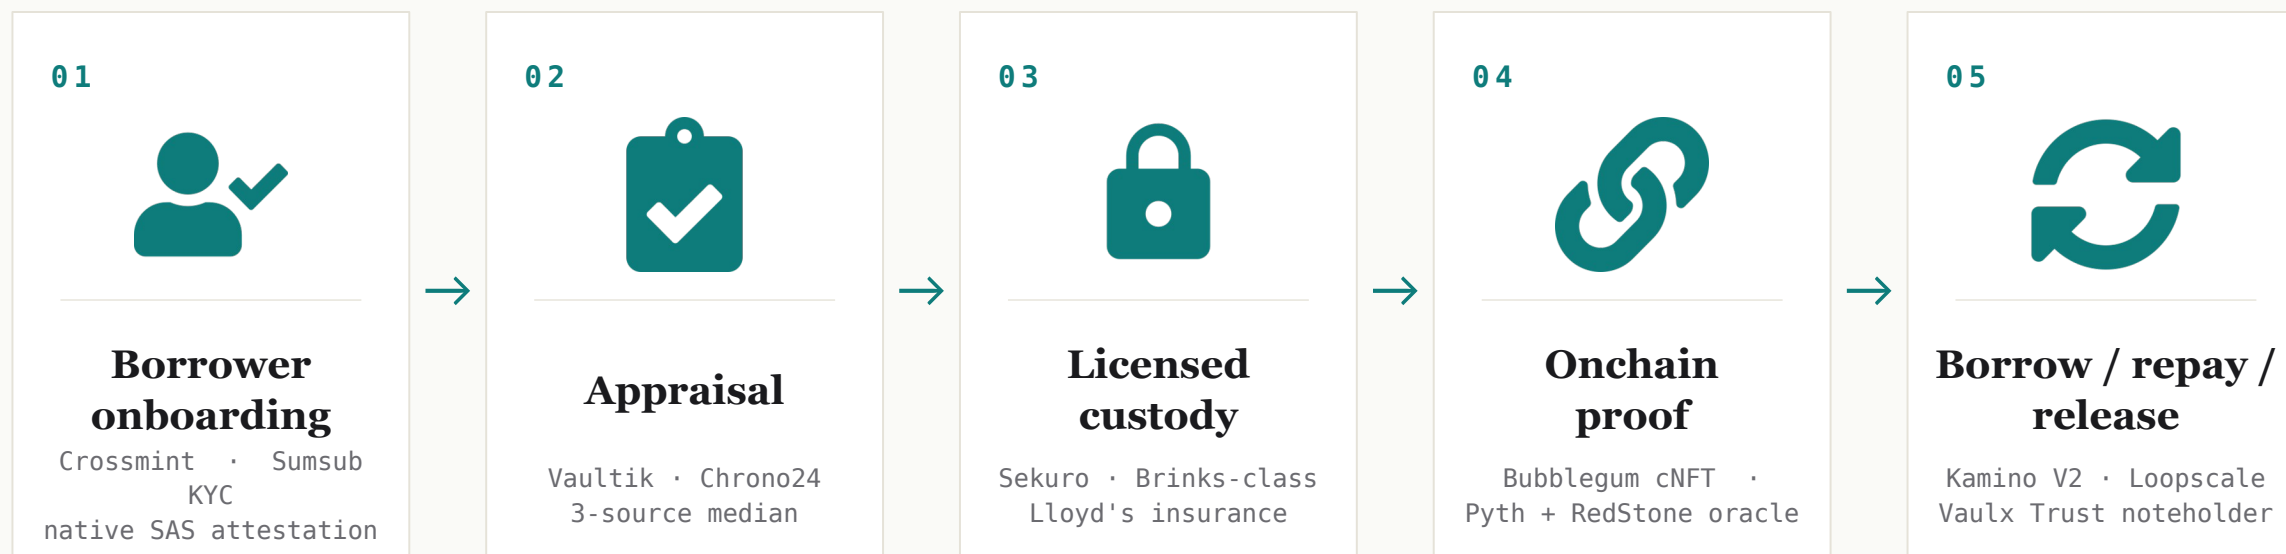

THE ATOMIC INVARIANT

No USDC disburses until the licensed custodian's keypair signs custody-confirmation — atomically, in the same transaction.

→ No competitor in physical-collateral lending has shipped this on-chain — Aave, Maple, Centrifuge, none.

Eight of ten modules ship globally.

The credit core ships once. Only offline appraisal and licensed custodian swap per market — 60-to-90-day market entry.

8 OF 10

Global core

Solana programs · cNFT logic · Sumsu KYC
Lloyd's insurance · oracles · Vaulx Trust
online appraisal · curated lending rails

2 OF 10

Local adapters

offline appraisal · licensed custodian
swap per market in 60–90 days

Cheaper than Brazil's cheapest formal credit. 2.5× more capital per asset.

Side-by-side on a \$14k Rolex Submariner, 12-month interest cost. Vaultx wins on rate AND on usable capital.

Option	APR	LTV	\$ borrowable on \$14k Rolex	12-mo interest
Credit-card rotativo	~450%	n/a	n/a	massive
Consumer loan	~61%	n/a	n/a	~\$3,050 on \$5k
Caixa penhor	~30%	20% (scrap-metal)	~\$2,800	~\$840 on \$2,800
VAULX	24%	50% (full asset value)	\$7,000	~\$1,680 / yr

→ **Cheaper rate** than even Caixa penhor (24% vs 30%)

→ **2.5× more capital** per asset (50% LTV vs 20% scrap-metal LTV)

→ **LP nets ~5% APR** (collateralized + insured) · Vaultx earns \$300–600 / asset / yr

Reconciliation: 24% borrower all-in = 8% capital + 12% operations + 4% risk.

3-BUCKET COST OF CREDIT

Cost of capital	8%
Cost of operations	12%
Cost of risk	4%

BORROWER ALL-IN 24%

Operators, builders, and market access.

Banking. Operational execution. Electronic-security infrastructure. Solana engineering. Live DeFi distribution.

**George
Dimitrov**
CEO / CTO

Global banking · corporate execution · regulatory affairs. Drives institutional partnerships on-chain and off-chain.

Marcelo
COO · Gitel
founder

38 years building Brazilian electronic-security infra: CCTV · IoT · access control · NOC. The exact stack behind Vault's atomic custody invariant.

Rodrigo
Partnerships &
BD

Proven BD across Brazil and LATAM. Owns Mercado Bitcoin and other BR partnerships with Marcelo.

Edson
Senior Solana
Engineer

All on-chain and protocol-level engineering. Shipped 4 Anchor programs across Phase 1-3.

Felipe
DeFi &
Community
Advisor

Founder of 4p.finance. Strong DeFi ties US / Brazil. Advises on partnerships and community.

NO COMPETITOR CAN ASSEMBLE THIS TEAM. *Active commercial conversations with appraisers, custodians, curators.*
