

vaulx

Your assets. Liquid.

Borrow against luxury watches and jewelry at 50–60% LTV. Custody and repayment enforced on-chain.

LIVE DEMO: github.com/Vaulxfi/project

PARTNERS

Solana · **Superchain** · **4Pay Finance**

George Dimitrov · Marcelo Coelho · Rodrigo Coelho · Felipe 4P · Edson Pohren

Stranded collateral. Punitive credit.

Hundreds of millions own luxury assets the credit system won't price. Meanwhile Brazil runs the G20's worst lending spread.

40.22%

Brazil avg. lending APR (World Bank 2024)

13-30%

Effective LTV at Caixa pawn monopoly

~0%

Luxury collateral currently on-chain

The borrower we serve: owns a R\$50K Rolex, no bank credit available, needs R\$25K in 48 hours. Caixa offers R\$8-15K. We offer R\$25K.

Custody enforced in code.

Loans cannot disburse unless physical custody is cryptographically confirmed.

```
require!(  
    trdc.status == ACTIVE, CustodyNotConfirmed  
);
```

Asset registered

Custody confirmed

cNFT minted

USDC disbursed

Repay or auction

The one line every RWA protocol promises. Vaultx enforces it in the vault program.

Built. Running. On-chain.

End-to-end loan cycle live on Solana devnet. Every state transition verifiable.

PROGRAM

Vault Program

Anchor/Rust · PDAs · CPI-gated
loan disburse requires TRDC ACTIVE

PROGRAM

Loan Program

TRDC lifecycle · Bubblegum cNFT
mint → custody confirm → disburse → repay

REPO

Public · Anchor tests · architecture diagrams
open to judges

DEVNET

End-to-end cycle shipped

Program IDs + tx signatures on submission
registration · mint · custody · disburse · repay

Full architecture, Anchor tests, and program IDs in repo. Open to judges.

ARCHITECTURE

Vault Program

Holds stablecoin · CPI gate

Loan Program

TRDC lifecycle · custody logic

CPI

TRDC (compressed NFT · Metaplex Bubblegum)

status: PENDING · ACTIVE · REPAID · DEFAULTED

Custody oracle

Partner-vault signed event

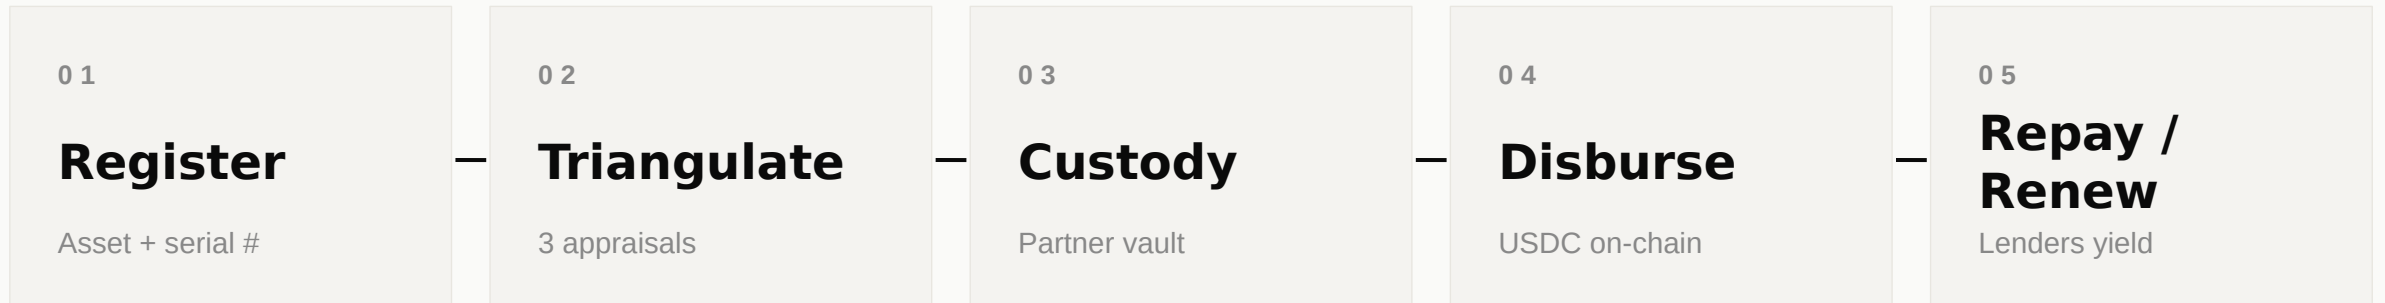

Vault ATA

USDC / BRZ balance

Custody gate: disburse reverts until custody oracle flips TRDC → ACTIVE.

Real-time on-chain. 24-72h end-to-end.

90-day cycle. State machine runs at chain speed; physical custody runs at logistics speed.

Unit economics

50%

Loan-to-value

24%

Borrower APR

11%

Lender APY

4-6%

Net platform margin*

* Net of cost of capital, appraisal, custody, and SCD revenue share.

On default: collateral sold through pre-defined legal recovery process; platform lenders first in line. Recovery target 90% at 50% LTV — structurally supported by 50% collateral buffer and US pawn benchmark ~85% redemption.

The only protocol in this quadrant.

Physical-collateral native + on-chain enforcement + LatAm-licensed.

C O M P E T I T I O N				
	Physical	On-chain	LatAm	Recovery
Caixa (BR monopoly)	Yes	No	Yes	Judicial
Credix	No	Yes	Partial	Contractual
Goldfinch / Maple	No	Yes	Global	Contractual
Centrifuge	No	Yes	Global	Contractual
Informal pawn	Yes	No	Yes	None
Vaultx	Yes	Yes	Yes	Codified

W H Y N O W

CNJ 196/2025 codified extrajudicial recovery. Lei 14.905/2024 cleared usury law. BRZ and BRLV live on Solana. RWA TradFi convergence underway.

W H Y S O L A N A

cNFT mints are sub-cent — physical-collateral economics work. 400ms finality on state transitions. Anchor constraint model enforces the custody gate at the runtime level.

W H Y U S

Banking + regulatory + custody + on-chain distribution + senior Solana engineering. Five founders, five axes, zero overlap. Details on slide 7.

Five founders. One thesis.

George Dimitrov

CEO · Vienna

15+y cross-European banking (10+ markets). Regulatory work on Digital Euro, MiCAR, FATF. 7y personal crypto: DEX, CEX, DeFi.

Marcelo Coelho

COO · São Paulo

CEO Gitel — 38y industrial security integrator, 60+ corporate clients (Gerdau, ArcelorMittal, CSN). Crypto market participant since 2021.

Rodrigo Coelho

Head of Sales · São Paulo

BR sales + partner onboarding. Custody and merchant network development. Crypto market participant since 2021.

Felipe "4P"

Strategic Advisor · US

Multiple crypto cycles. DeFi operator, crypto payment rails. SP luxury watch reseller network access. US VC relationships.

Edson Pohren

Lead Developer · BR

Senior Solana engineer. Anchor, Bubblegum, PDAs, CPI patterns. Owns on-chain programs and integration backend.

WHAT COLOSSEUM UNLOCKS

8 weeks. One pilot.

- Audit-scheduled mainnet deployment
- Signed custody partner + SCD structure live
- First 10–20 pilot loans in São Paulo
- First lender capital in the vault

TRACTION IN MOTION

Custody partner dialog — Brinks / Prosegur / Loomis

SCD partnership — 2 licensed candidates in scoping

Borrower pipeline — Felipe's SP watch reseller network

Legal launch path — partner SCD originates CCBs; own licensing in parallel
